

It doesn't take much energy to be smart.

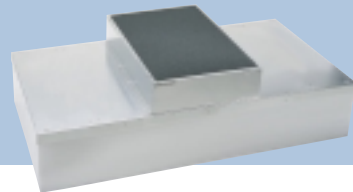

Introducing the **MAC 10 IQ**™

The new MAC 10 IQ has the lowest energy consumption of any FFU. Only 80 watts at 90 FPM.

And did we mention that it's smart? The innovative MAC 10 IQ is the first FFU with a brain. Its micro-computer-controlled, brushless DC, GE ECM™ motor maintains constant airflow over a wide range of external static pressures.

Since it's a MAC 10, of course it's quiet. Just 49 dBA measured 30" from the filter face at 90 FPM.

Get smart. Contact Envirco about the new MAC 10 IQ today.
